

**MICREX DEVELOPMENT CORP.**  
**Management Discussion and Analysis**

The following discussion was prepared April 29, 2014, of the financial condition, changes in financial condition and results of operations of the Corporation for the period ended February 28, 2014 should be read in conjunction with the financial statements of the Corporation and related notes included therein.

**Forward-Looking Information**

This management discussion and analysis ("MD&A") contains certain forward-looking statements and information relating to Micrex Development Corp. ("Micrex" or the "Corporation") that are based on the beliefs of management as well as assumptions made by and information currently available to the Corporation. When used in this document, the words "anticipate", "believe", "estimate", "expect" and similar expressions, as they relate to the Corporation or its management, are intended to identify forward-looking statements. Such forward-looking statements relate to, among other things, regulatory compliance, the sufficiency of current working capital, the estimated cost and availability of funding for the continued exploration of the Corporation's exploration properties. Such statements reflect the current views of the Corporation with respect to future events and are subject to certain risks, uncertainties and assumptions. Many factors could cause the actual results, performance or achievement of the Corporation to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements.

Specific forward looking statements include:

- commercialization of the granite property acquisition. Risks includes failing to obtain government operating permits in a timely manner, operational problems and the inability to enter into commercially advantageous sales contracts;
- putting Burmis property into production. Risks include delay or failure to obtain government permits, technical problems in operations, failure to raise sufficient funds to put the property into production, failure to enter into commercially acceptable supply or sale agreements, and failure to enter into a satisfactory agreement with the co-owners of the property;
- putting the Quebec property into production. Risks include failure to enter into commercially acceptable supply or sale agreements and technical problems during operations;
- requirement of the Corporation to raise additional equity or sell property interests to raise sufficient capital to continue operations. Risks include the failure to raise such equity due to market conditions or otherwise and failure to find interested parties willing to enter into commercially acceptable agreements.

**Overall Performance**

The Corporation continues its focus as a natural resource corporation with interest in precious metal and industrial minerals properties located in Alberta, Quebec, B.C. and New Mexico. The Corporation focuses the majority of its attention on the "proving up" of prospective properties as exploration dollars can be focused in a direct manner and the commercialization of advanced industrial mineral properties. Active exploration for undiscovered resources is, at present, not a priority. The Corporation is interested in properties which have a demonstrated resource, usually through historical production or testing by credible authorities such as Government Geological Survey personnel. The Corporation gives high priority to those properties which can be brought to production with relatively low cost and in a timely manner.

The Corporation acquired a granite quarry in Quebec in the quarter. The Corporation has made some minor sales to date and is focussing on growing sales.

One gold exploration property is located in British Columbia and has excellent potential for future development. The Burmis Magnetite property is at the permitting stage. The Corporation has two gold properties in New Mexico. The Corporation's Quebec property is at the stage where magnetite apatite and titanium production will be commenced as soon as a firm purchase order is received.

The Corporation is in the middle of the permitting process for its Alberta magnetite property. The Corporation is involved in a long and complicated government process to obtain a mining permit for its Burmis property. The Corporation and its consultants believe that such permit will be granted, but there is no assurance as to when or if that may happen.

The Corporation continues to discuss possible joint venture or sale transactions in respect to its gold properties, and is actively looking at other opportunities in the industrial minerals sector.

### **Six Month Ended February 28, 2014**

#### ***Results of Operation***

During the period ended February 28, 2014, the Corporation incurred a loss of \$195,695. Principal activities included acquisition of and seeking customers for the Quebec granite quarry. The Corporation had no revenue. General and administrative expenses amounted to approximately \$188,833, including wages in the form of consulting fees. Depreciation was \$1,062, and there was stock based compensation equal to \$20,844.

#### ***Liquidity and Capital Resources***

As at February 28, 2014 the Corporation had 57,937,439 common shares outstanding. During the period no shares were issued. The Corporation had cash on hand of \$9,440, and current liabilities of \$514,747, of which \$211,460 was due to directors and shareholders. Like all mineral exploration companies, until production can be achieved, the Corporation is reliant on raising equity or selling property interest to continue operations.

Additional capital will need to be raised for working capital, development costs and additional exploration programs on the Corporation's properties. The amount and timing of such will depend upon the results of current exploration programs and market conditions at the time. The Corporation's ability to continue to fund its operations depends upon its ability to sell shares to raise equity both on a flow-through and non flow-through basis, sell properties and rely on short term loans from insiders as it has no regular source of revenue until it achieves more significant production income from its granite quarry business.

### **Six Months Ended February 28, 2013**

#### ***Results of Operation***

During the six month period ended February 28, 2013, the Corporation incurred a loss of \$180,124. The Corporation had no revenue. General and administrative expenses amounted to approximately \$178,505, including wages in the form of consulting fees. Depreciation was \$809 and stock based compensation was recorded at nil.

For the three months ending February 28, 2013, the Corporation has incurred a loss of \$107,153. No revenue has been earned and total general and administrative costs have been \$106,341, with depreciation of \$809 and stock based compensation expense of nil.

### **Liquidity and Capital Resources**

As at February 28, 2014 the Corporation had 57,487,439 common shares outstanding. During the six month period no shares were issued.

### **Outlook**

The Corporation has long term debt of \$403,059 which it incurred to purchase the granite quarry and fund operations until sustainable revenue is achieved. It plans to raise the funds necessary to put the Burmis and Quebec properties into production with a combination of debt, including supplier financing, and equity. The total funds required to be raised in this respect is approximately \$1,500,000 for Burmis, and \$2,500,000 for Quebec.

For 2014, the Corporation plans to continue to focus its efforts on its Quebec granite and magnetite properties. The Alberta permitting process has been slow and expensive and the Corporation plans to continue with next steps as soon as it achieves Quebec production. In Quebec several potential customers have expressed interest in the magnetite and certain other elements present on the St Charles property, but none have yet placed a firm order large enough to justify going into production. Progress has been made towards getting the Quebec magnetite deposit into production. The Corporation anticipates receiving production revenue during the 2014 calendar year from its new granite property.

The Corporation is planning to conduct further exploration on its Big Horn gold property if capital becomes available. Its New Mexico properties continue to attract attention from third parties looking to participate or acquire the same.

The Corporation's ability to continue as a going concern is dependent on Micrex either generate cash flow or continue to raise money or sell assets. There is little apparent appetite for equity of junior mineral exploration companies currently, and given the fact that most mineral exploration companies have no monies available to purchase assets, Micrex has determined that its best chance to succeed in today's mining environment is to acquire a business that generates cash flow. It's recent acquisition of the granite quarry was financed by insider loans as no other source of funding was available. These loans provide for an interest rate of 5% and a cumulative 5% royalty on production on industry standard terms until repaid, and then 2% thereafter. The Corporation anticipates that this acquisition will result in a regular source of cash, in sufficient amount as to meet its overhead obligations, reduce debt and provide an exploration budget for its other properties.

### **Risk Factors**

#### **(a) Operating History**

The business of the Corporation should be considered highly speculative due to its present stage of development. The Corporation has limited cash and other assets, no revenue and a limited business history.

#### **(b) Mining Operations**

Exploration for minerals involves many risks, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. Further, most of the properties of the Corporation (the "Properties") have no known commercial reserves. There is no assurance that further commercial quantities of ore will be discovered by the Corporation. Except for the magnetite properties, none of the Properties contain a known body of commercial ore and any exploration programs thereon are exploratory searches for commercial ore, which increases the degree of risk substantially as compared to properties in the development stage. In addition, some of the Properties may be difficult or impossible to access during periods of inclement weather, which are risks normally encountered by most industry participants.

Mineral exploration and development involve significant risks and few properties which are explored are ultimately developed into producing mines. There is no assurance that commercial quantities of minerals will be discovered on the Properties nor is there any guarantee that the exploration programs thereon will yield positive results. The discovery of mineral deposits depends upon a number of factors, not the least of which is the technical skill for the exploration personnel involved. The exploration and development of mineral properties and the marketability of any minerals contained in such properties will also be affected by numerous factors beyond the control of the Corporation. These factors include government regulation, high levels of volatility in market prices, availability of adequate transportation and refining facilities and the imposition of new, or amendments to existing, taxes and royalties. The effect of these factors cannot be accurately predicted.

Whether a mineral deposit once discovered will be commercially viable also depends on a number of factors some of which include the particular attributes of the deposit, such as size, grade and proximity of infrastructure, as well as metal prices, which are highly cyclical. Most of the above factors are beyond the control of the Corporation. The Corporation must also compete with a number of companies that have greater technical or financial resources. The Corporation is unable to predict the amount of time which may elapse between the date when any new mineral reserve may be discovered and the date when production will commence from any such discovery.

**(c) Government Regulations and Market**

Mining operations are subject to government regulation. Operations may be affected in varying degrees by government regulation such as restrictions on production, price controls, tax increases, expropriation of property, environmental and pollution controls or changes in conditions under which minerals may be marketed. Should the Corporation be unable to obtain the necessary regulatory approvals, or should obtaining or complying with the terms of the necessary approvals require funds in excess of the resources of the Corporation, the development of the Properties may be delayed.

An excess supply of certain minerals may exist from time to time due to lack of markets and restrictions on exports. The marketability of both base and precious metals will be affected by numerous factors beyond the control of the Corporation. These factors include market fluctuations and government regulations relating to prices, taxes, royalties, allowable production and importing and exporting minerals. The effect of these factors cannot be accurately determined.

**(d) Conflicts**

The directors of the Corporation are engaged and will continue to be engaged in the search for mining interests on their own behalf and on behalf of other companies, and situations may arise where the directors and officers may be in direct competition with the Corporation. Conflicts of interest, if any, which arise will be subject to and governed by procedures prescribed by the Business Corporations Act (Alberta) which require a director or officer of a corporation who is a party to, or is a director or an officer of or has a material contract with the Corporation to disclose his interest and, in the case of directors, to refrain from voting on any matter in respect of such contract unless otherwise permitted under the Business Corporations Act (Alberta).

**(e) Need for Additional Funds**

The Corporation has limited financial resources and has no assurance that additional funding will be available to it for further exploration and development of its projects. There can be no assurance that the Corporation will be able to obtain adequate financing in the future or that the terms of such financing will be favourable. Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of its projects with the possible loss of such properties. If financing is raised through the issuance of shares from the Corporation's treasury, control of the Corporation may change and investors may be subject to further dilution.

(f) **Operating Hazards and Environmental Liabilities**

The operations to be conducted by the Corporation will be subject to all of the operating risks normally attendant upon mineral exploration and development. The Corporation carries basic liability insurance with other insurance needs met on a project by project basis.

The Corporation may become subject to liability for destruction of mineral properties or facilities, personal injury, pollution and other hazards against which it cannot insure or against which it may elect not to insure because of high premium costs or other reasons. The payment for such liabilities would reduce the funds available for exploration and mining activities, and may have a material adverse effect on the Corporation's financial position.

(g) **Industry Conditions**

The mining industry is highly competitive and the Corporation must compete with many companies with greater financial strength and technical resources. Generally, there is intense competition for the acquisition of resource properties considered to have commercial potential. Prices paid for minerals produced are subject to market fluctuations and will directly affect the profitability of producing any mineral reserves which may be developed by the Corporation. Mining operations, including exploration, are subject to extensive government regulation. Operations may be affected from time to time in varying degrees by political and environmental developments, such as restrictions on production, price controls, tax increases, expropriation of property, pollution controls and changes in conditions under which certain minerals may be exported.

(h) **Foreign Jurisdiction**

Certain of the Properties are located in foreign jurisdiction. The enforceability, certainty and permanence of laws in foreign countries are not always like that in Canada. The Corporation's title to its foreign Properties, the right to work the same and to expatriate profits, if any, may be adversely affected. The Corporation is also at risk to adverse foreign exchange movements.

Mining operations in Canada, United States and elsewhere are subject to extensive regulation by local, provincial and federal governments. Future changes in governments and regulation could adversely affect mining in Canada and the United States. The development of mines and related facilities is contingent upon government approval which must be obtained through statutory review processes.

No current title opinion or report has been obtained regarding the Properties. The Properties may be subject to prior unregistered agreements, interests or native land claims and title may be affected by undetected defects.

**Summary of Quarterly Results**

***Two Year Quarterly Financial Data***

<b>2014</b>	<b>May 31/13</b>	<b>Nov 30/13</b>	<b>Aug 31/13</b>	<b>Feb 28/14</b>
Total Revenue (\$)	\$122,500	Nil	Nil	Nil
Total Income (loss) (\$)	(182,757)	(58,689)	(2,888,740)	(137,004)
Income (loss) per share (\$)	(0.003)	(0.001)	(0.05)	(0.002)
<b>2013</b>	<b>May 31/12</b>	<b>Nov 30/12</b>	<b>Aug 31/12</b>	<b>Feb. 28/13</b>
Total Revenue (\$)	\$141,682	Nil	Nil	Nil
Total Income (loss) (\$)	(53,039)	(72,970)	(231,596)	(107,153)
Income (loss) per share (\$)	(0.001)	(0.001)	(0.004)	(0.002)

### **Transactions with Related Parties**

During the period Micrex recorded \$95,844 including share based compensation of \$20,844 (2012 - \$75,000) to Stan Marshall, president and a director for consulting and management services provided.

During the period, the Company recorded expenses of \$38,000 (2012 - \$63,000) to certain shareholders for subcontract services. At February 28, 2013, \$15,000 (2012 - \$33,445) owing was included in accounts payable.

The Corporation also paid legal fees of \$18,729 (2012 - \$13,145) to a law firm of which the corporate secretary is a partner.

The balance of \$211,460 (August 2013 - \$181,810) due to shareholders and directors are unsecured, non-interest bearing and are due on demand.

From the total amount of \$85,000 in promissory notes issued during the 2013 fiscal year, \$40,000 was from related parties. From the total amount of \$310,000 in promissory notes issued during the current year, \$244,000 was from related parties.

The above transactions occurred in the normal course of operations and are recorded at the exchange amount which represents the consideration established and agreed to by the related parties.

### **Outstanding Share Data**

As at February 28, 2014 the following shares, warrants and options are outstanding:

57,937,439 common voting shares.

### **Management and Directors' Options Outstanding**

<b>Number</b>	<b>Exercise Price</b>	<b>Expiry Date</b>
565,000	0.10	July 6, 2014
870,000	0.17	April 15, 2015
746,000	0.11	October 18, 2015
375,521	0.22	January 6, 2016
968,570	0.24	March 24, 2016
381,484	0.16	December 19, 2016
578,452	0.10	April 24, 2017
787,616	0.10	July 16, 2017
521,100	0.10	January 10, 2019

The following warrants were also outstanding:

<b>Number of Warrants</b>	<b>Exercise Price</b>	<b>Expiry</b>
340,000	\$0.10	31/12/2014

### **Critical Accounting Policies**

#### **International Financial Reporting Standards (IFRS)**

The Company's financial statements for the year-ending August 31, 2012 were the first annual financial statements that were prepared in accordance with IFRS, IFRS 1, First Time Adoption of International Financial Reporting Standards, requires that comparative financial information be provided. As a result, the first date at which the Company has applied IFRS was September 1, 2010 (the "Transition Date").

IFRS 1 requires first-time adopters to retrospectively apply all effective IFRS standards as of the reporting date, which for the Company will be August 31, 2012. However, it also provides for certain optional exemptions and certain mandatory exceptions for first time IFRS adoption. Prior to transition to IFRS, the Company prepared its financial statements in accordance with pre-changeover Canadian Generally Accepted Accounting Principles ("pre-changeover Canadian GAAP").

In preparing the Company's opening IFRS financial statements, the Company has adjusted amounts reported previously in the financial statements prepared in accordance with pre-changeover Canadian GAAP.

### **Optional Exemptions**

The IFRS 1 applicable exemptions and exceptions applied in the conversion from pre-changeover Canadian GASB to IFRS are as follows:

#### **Business Combinations**

The Company elected not to retrospectively apply IFRS 3 Business Combinations to any business combinations that may have occurred prior to its Transition Date and such business combinations have not been restated.

#### **Share-based Payment Transactions**

The Company has elected not to retrospectively apply IFRS 2 to equity instruments that were granted and had vested before the Transition Date. As a result of applying this exemption, the Company will apply the provisions of IFRS 2 only to all outstanding equity instruments that are unvested as at the Transition Date to IFRS.

#### **Compound Financial Instruments**

The Company has elected not to retrospectively separate the liability and equity components of compound instruments for which the liability component is no longer outstanding at the date of transition to IFRS.

### **Mandatory Exceptions**

#### **Estimates**

The estimates previously made by the Company under pre-changeover Canadian GAAP were not revised for the application of IFRS except where necessary to reflect any difference in accounting policy or where there was objective evidence that those estimates were in error. As a result the Company has not used hindsight to revise estimates.

### **Multilateral Instrument 52-109 Disclosure Evaluation**

#### **Evaluation of Disclosure Controls and Procedures**

Micrex has evaluated the effectiveness of its disclosure controls and procedures and have concluded that they are sufficiently effective to provide reasonable assurance that material information relating to the Corporation is made known to management and disclosed in accordance with applicable securities regulations.

**Additional Disclosure**

	<b>February 28, 2013</b>	<b>February 28, 2014</b>
Consulting fees and sub-contracting fees	\$138,000	\$113,000
Stock based compensation	nil	\$20,844
Professional fees	\$26,552	\$29,673
Total general and administrative costs	\$178,505	\$188,833

<b>Deferred Exploration and acquisition costs, by property:</b>	<b>August 31, 2013 \$</b>	<b>February 28, 2014 \$</b>
Burmis Magnetite Deposit	Nil	4,293
Big Horn Mine	350,000	350,000
Deadwood	133,476	133,476
Quebec Deposit	1,507,501	1,488,618
Mount Royal Mine	111,065	114,595
Accumulated deferred exploration and acquisition total	2,102,042	2,090,982

Further information with respect to the Corporation can be found on its website at [www.mixcorp.com](http://www.mixcorp.com) and on the SEDAR website.
